## DETAILED OFFICE ACTION

### *Rejections Under 35 USC 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 23, 24, 28 and 31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. This is a **new matter** rejection.

For claim 1, the specification as filed does not support the definition of R4 as "phenyl, which is optionally substituted with –OH, alkoxy or halogen." The specification at page 10, lines 14-15 and page 11, lines 2-3, defines R4 as "phenyl, (C1-C20)-alkylphenyl or (C12-C20)-alkyl which is optionally substituted with –OH, alkyloxy or halogen." It is clear that –OH, alkyloxy or halogen may substitute only (C12-C20)-alkyl because of the use of the singular verb "is."

Claim 24 is broader than claim 23; claim 23 defines R4 as "phenyl, which is optionally substituted with –OH, alkoxy or halogen," while claim 23 defines R4 as "chosen from phenyl, (C1-C20)-alkylphenyl and (C12-C30)-alkyl which is optionally substituted with –OH, alkoxy or halogen."
